</ol>
```

Q.5. Reading about these topics on mdn:

- 1. HR tag in HTML
- 2. HTML Entities

Ans5.

1. <hr> : The hr element represents a paragraph-level thematic break, e.g. a scene change in a story, or a transition to another topic within a section of a reference book by MDN.

2. HTML Entities : HTML entities are character sequences that represent reserved characters or invisible characters in HTML. They are used to display characters that are not on a standard keyboard, or characters that could be interpreted as HTML code.
