

Grid Layout Assignment Question

1. Create the following layout using CSS Grid:

- Divide the grid into 12 rows and 12 columns.
- Give a gap of 10px between each row and column.
- Set the sizing of individual boxes as shown in the provided image.

2. Use Media Queries to change the above layout to the given one when the viewport width goes below 720px.

3. Complete the following code to create a webpage loader using CSS animations:

Load.html

```

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport"
content="width=device-width, initial-scale=1.0">
  <title>CSS</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <h1>Loader</h1>
  <div class="loader"></div>
</body>
</html>

```

Load.css

```

.loader {
  border: 16px solid #f3f3f3;
  border-top: 16px solid goldenrod;
  border-radius: 50%;
  width: 120px;
  height: 120px;
  animation: spin 2s linear infinite;
}

@keyframes spin {
  0% { /* Set rotation to 0 degrees */ }
  100% { /* Set rotation to 360 degrees */ }
}

```

```
}
```

Fill in the missing parts of the animation to rotate the loader smoothly.
