Assignment of JS

Write JavaScript code to create a new `<input>` and `<button>` element on the page dynamically. Set the text of the button to "Click me".

Modify the newly created elements by adding the following attributes:

- Change the placeholder value of the input to "username".
- Change the `id` of the button to "btn".

Access the button using both `querySelector` and button ID, then:

- Change the button's background color to blue.
- Change the button's text color to white.

Create an `<h1>` element on the page and set its text to "DOM Practice" (underlined). Change its color to purple.

Create a `<p>` tag on the page and set its text to:
 "Coding is not a Field, it's a Journey -- Bhavy Sharma", ensuring that "Journey" appears in bold.
